

GLOBAL SUMMIT

India's Largest Hackathon - Part of the Global Summit at RV College of Engineering

Event Workflow

1. Theme: From Explainable to Accessible: Democratising AI

a. Domain: Artificial Intelligence — Explainable AI (XAI)

b. Brief: The theme redefines Explainable AI from a pure auditing tool into a trust-builder. By giving domain experts the confidence to automate routine tasks and restrict human oversight to critical decisions, XAI reduces manpower bottlenecks — unlocking accessible AI so that severely understaffed industries can safely scale their operations.

2. Platforms: Online hackathon-hosting services (e.g. hack2skill, HackerEarth, HackCulture, Agorize)

3. Preliminary Round (Mode - Online):

a. Registration: Via selected platform

b. Deliverables from participants: PPT with complete flow of idea and implementation details

c. PPT template: To be curated by the organizing team

d. Judging and Qualification: Track-wise qualification of top teams to the finale, capped at ~80–100 teams

4. Final Round (Mode - Offline):

a. Deliverables: Execution of the proposed idea from the preliminary round, with live evaluation by jury

b. Prizes: 1st Prize – ₹3,00,000 | 2nd Prize – ₹2,00,000 | 3rd Prize – ₹1,00,000

c. Duration: 1-day final round (24-hour buildathon)
